

DA Brite

A clinically advanced multi-active cream designed to target stubborn pigmentation, melasma, and uneven skin tone through multi-pathway melanin control, while supporting skin barrier repair and hydration.

Key Benefits

- **Niosome Technology**
- Visibly reduces dark spots, melasma & discoloration
- Brightens and evens skin tone
- Improves skin clarity and smoothness
- Hydrates without heaviness
- Enhances overall skin radiance

Multi-Pathway Depigmentation System

- **Niosomal Tranexamic Acid**
For a depigmenting and anti-inflammatory action, DERMA-VECT TRX is a powerful and targeted solution for the treatment of skin discolorations such as melasma, sunspots, and post-inflammatory hyperpigmentation. Vectorization within Niosome vesicles allows for better absorption and consequently greater effectiveness, ideal for advanced anti-blemish treatments and also perfectly suited to sensitive skin
- **Niacinamide**
Blocks melanin transfer + improves barrier
- **Alpha Arbutin**
Targets uneven skin tone
- **4-n-Butyl Resorcinol**
One of the most effective tyrosinase inhibitors

Next-Gen Brightening Boosters

- **Melanostatin whitening peptide**
Reduces melanin synthesis signaling
- **SymRadiance**
Improves radiance and luminosity
- **Nio-Oxy**
NIO-OXY is a vectorized preparation of Oxyresveratrol (2', 3, 4', 5 tetrahydroxystilbene), a molecule isolated from the oriental herbal medicines Ramulus Mori and encapsulated into elastic niosomal vesicles.
NIO-OXY is the only effective skin whitening complex based on the encapsulation of high level of Oxyresveratrol into niosomal ultra deformable vesicle in order to deliver the promised effects

PRODUCT CLAIMS:

- Melasma
- Hyperpigmentation
- Post-inflammatory pigmentation (PIH)
- Uneven skin tone
- Dull skin

pH: 5.5±0.5

HOW TO USE:

When to Apply

- Night use only (recommended)
- Can be used in morning only if mild + with strict sunscreen

30gm
